

DEPARTMENT OF CONSERVATION AND ENERGY (C&E)
HAZARDOUS MATERIALS

I hereby attest that, on 3/31/2026, I conducted a site assessment for the assigned floors upon which the Department of Conservation and Energy rents space within the LaSalle Building. I have determined that there are no hazardous materials used or stored therein. Therefore, a written hazardous materials communications plan is not required at this time.

If this changes in the future, C&E will formulate a plan and disseminate same to its employees.

Naanda Riser
Safety Coordinator
